Curriculum of Certificate Course in Intensive Customer Service Training

Curriculum of Certificate Course in Intensive Customer Service Training

Overviews:

The main objectives of customer service training are to improve customer satisfaction and build customer loyalty. Customer Service training can help employee improve a company's brand reputation and lead to positive word-of-mouth marketing.

Other objectives of customer service training include: Aligning support goals with business priorities, Delivering swift resolutions, Acquiring new customers, Reducing employee turnover, and Increasing sales.

This workshop will help students sharpening their skills in providing good Customer service and handling customers over the counter or over the phone call. It will also improve their Marketing and Selling Skills.

After successful completion of the course, the students will be able to :

- Improve customer satisfaction

Customer service training helps employees handle a variety of customer service scenarios, which can lead to higher customer satisfaction.

- Build customer loyalty

When customers are satisfied with a product or service, they are more likely to trust the brand, make repeat purchases, and recommend the company to others.

- Increase employee morale and job satisfaction

Customer service training can help employees feel more confident in their ability to handle customer inquiries and complaints. This can lead to increased job satisfaction and retention.

- Improve productivity

Customer service training can lead to increased productivity by improving employee motivation and morale.

- Improve brand reputation

Course Code : CC/VAC/ICST

Courses Duration : 60 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA/B.Sc.IT/BBM course in the college

Duration

- 60 Hours/Class with Theory & Practical

Structure of Syllabus of Intensive Customer Service Training

Sl. No.	Paper Topics	Duration	Remarks	Credit Point / Marks
1	Introduction to Customer Service - About Diploma in Customer Service, CSD Department, Customer, service, consumer, customer needs, customer service, agenda of customer, Principals of customer needs, Meeting or Exceeding the customer's expectations, Customer Satisfaction, Making Customers loyal to you, etc.	10 Hours	8 Hour Theory + 2 Hour Discussion / Activity	20 Marks
2	Marketing & Selling – selling, marketing, sales call, market, product, service, quality, value, marketing concept, Business factor, marketing deals, quality of sales, rule of selling, etc.	10 Hours	8 Hour Theory + 2 Hour Discussion / Activity	20 Marks
3	Telephone Etiquette – Etiquette, before, between and end of the call handling, Difficult customers, Five Forbidden Phrases, etc.	12 Hours	8 Hour Theory + 4 Hour Discussion / Activity	20 Marks
4	Introduction to Call Centre / BPO / KPO Industry – call centre and its types, Floor manager, CCE/CCR, TL/Sup, etc.	8 Hours	6 Hour Theory + 2 Hour Discussion / Activity	15 Marks
5	Customer Relationship Management (CRM) – Advantages, Phases, Acquisition, Enhancement, Pruning, Retention, Area of CRM, Service, sales, etc.	10 Hours	6 Hour Theory + 2 Hour Discussion / Activity	15 Marks
6	Computer Telephone Integration (CTI) – Computer Telephone Integration, Caller Line Identifier, Voice response, Automatic call distributor & dialler, multiplexer, etc.	10 Hours	6 Hour Theory + 2 Hour Discussion / Activity	10 Marks
		60 Hours	42 Hours Theory + 14 Hours Discussion / Activity	100 Marks

Fee Structure:

- This ad-on course is offered free of cost to all the students for their skill development. The college does not charge any fees, either for doing the course, practical, examination or certification.

Curriculum of Certificate Course in Micro finance

Overviews:

The objective of studying microfinance is to understand the role of financial services in promoting economic empowerment, alleviating poverty, and fostering sustainable development, particularly for low-income individuals and communities. Microfinance focuses on providing small loans, savings, insurance, and other financial services to people who are typically excluded from the formal banking system due to lack of collateral, credit history, or geographical barriers.

Here are the following key objectives of studying microfinance:

1. To explore how microfinance services can provide financial access to marginalized and low-income individuals or communities.
2. Examining the Role of Microfinance in Economic Empowerment
3. To understand how microfinance empowers individuals, especially women, by giving them the resources to become financially independent and improve their social and economic status.
4. To study how microfinance addresses the financial exclusion of low-income groups who are unable to access traditional banking services due to lack of collateral, credit history, or other barriers.
5. To investigate how microfinance institutions (MFIs) balance the dual objectives of financial sustainability and social impact.
6. To explore the broader social impact of microfinance, such as improvements in education, healthcare, gender equality, and empowerment of marginalized groups.
7. To understand how microfinance fosters entrepreneurship by providing small loans or credit to start or grow businesses.
8. To critically assess the limitations and challenges faced by microfinance, including high-interest rates, over-indebtedness, and the risk of exploitation.
9. To learn about the legal, regulatory, and policy frameworks that govern microfinance activities and institutions in different countries.

Curriculum of Certificate Course in (PHP/MYSQL)

Curriculum of Certificate Course in PHP/MYSQL

Overviews: PHP (Hypertext Preprocessor) is a:

1. Server-side scripting language
2. Open-source and free
3. Cross-platform (Windows, Linux, macOS)
4. Used for web development, especially for dynamic websites and web applications

Object-oriented programming (OOP)

5. Support for various databases (MySQL, PostgreSQL, MongoDB)
6. Extensive libraries and frameworks (Laravel, CodeIgniter, Symfony)
7. Integrated development environments (IDEs) like PHPStorm, NetBeans

Objectives:

1. Understand MySQL basics (data types, tables, queries)
2. Learn SQL commands (SELECT, INSERT, UPDATE, DELETE)
3. Master database design principles
4. Understand data modeling and normalization
5. Build simple MySQL databases
6. Learn advanced SQL concepts (joins, subqueries, indexing)
7. Understand database security and access control
8. Implement database backup and recovery techniques
9. Build dynamic MySQL databases (using PHP)

Course Code : CC/VAC/PHP

Courses Duration : 45 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 45 Hours/Class with Theory + Practical

Curriculum of Certificate Course in (Flutter App Development)

Curriculum of Certificate Course in Flutter App Development

Overviews:

Flutter is an open-source framework that allows developers to build apps for multiple platforms using a single codebases. Flutter is a software development kit (SDK) that helps developers create native apps for iOS, Android, the web, Windows, MacOS, and Linux. Flutter provides a collection of UI building blocks, called widgets, and compiles the codebase into native machine code. Flutter can reduce the development cycle; make apps more user-friendly and streamline processes and increase efficiency accessible, save time on development. Flutter includes the Dart programming language, which is simple and effective. Ahead-of-Time (AOT) and Just-in-Time (JIT) compilation types, no need for XML files.

Curriculum of Certificate Course in (Web Designing)

Curriculum of Certificate Course in Web Designing

Overviews: An HTML document structure is the foundational framework for web pages. It includes elements that define different parts of a web page, such as headers, paragraphs, links, and images. HTML tags create a hierarchy, including a section for metadata and scripts, and a section where actual visible content goes. Understanding HTML is crucial in web design, and knowledge can be deepened through courses like html css and javascript course, html javascript course, or certification html css javascript, available online. These courses often include practical exercises to build and enhance skills in creating structured, effective websites.

CSS (Cascading Style Sheets) is a styling language used in web development to design the appearance and formatting of HTML documents. Specifically, CSS fonts and color properties allow you to customize text styles and colors on a web page. The `font-family`, `font-size`, `font-weight`, and `font-style` properties help you alter typeface, size, thickness, and style of the text, respectively. Meanwhile, the `color` property lets you specify the text color, enhancing the visual hierarchy and readability of content. Mastering these CSS features is crucial for creating visually appealing and accessible websites.

JavaScript functions are blocks of code designed to perform specific tasks in web development. When called, a function executes the task it's designed for, which can range from simple calculations to complex operations. This modularity makes code reusable and more manageable. Learning JavaScript functions is an essential skill in web development and is typically covered in courses such as HTML CSS and JavaScript course, or more focused training like an HTML JavaScript course. Mastering these can be beneficial, and opting for an HTML CSS course online or HTML online certification might provide comprehensive knowledge including certification in HTML CSS JavaScript.

awk?

**Curriculum of Certificate Course in
(Linux AWK)**

Curriculum of Certificate Course in Linux AWK

Overviews:

AWK is a language for processing text files. AWK is typically used as a data extraction and reporting tool. It is a standard feature of most Unix-like operating systems. It consists of a set of actions to be taken against streams of textual data for purposes of extracting or transforming text, for eg: producing formatted reports. The language uses the string datatype, associative arrays, and regular expressions. AWK was created at Bell Labs in the 1970s and its name is an acronym derived from the surnames of its authors—Alfred Aho, Peter Weinberger, and Brian Kernighan.

BASH

THE BOURNE-AGAIN SHELL

**Curriculum of Certificate Course in
(Bash)**

Curriculum of Certificate Course in Bash

Overviews:

Bash is a command-line interpreter or Unix Shell and it is widely used in GNU/Linux Operating System. It is written by Brian Jhan Fox. It is used as a default login shell for most Linux distributions. Scripting is used to automate the execution of the tasks so that humans do not need to perform them individually. Bash scripting is a great way to automate different types of tasks in a system. Developers can avoid doing repetitive tasks using bash scripting.

Bash scripting supports variables, conditional statements, and loops just like programming languages.

Course Code: CC/VAC/BASH

Courses Duration: 30 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 30 Hours/Class with theory & practical

Structure of Syllabus Bash

S. No.	Paper Topics	Duration	Remarks	Credit
				Point/Marks
1	Introduction to Bash shell scripting	02 Hours	Theory	05 Marks
2	Command Line, Quoting, Globing	04 Hours	Theory + Practical	05 Marks
3	Export statement	04 Hours	Theory	10 Marks
4	Array Operations	02 Hours	Theory + Practical	10 Marks
5	Conditional execution	04 Hours	Theory + Practical	10 Marks
6	Nested and multilevel if else statement	03 Hours	Theory + Practical	10 Marks
7	Logical Operators, String and File attributes	04 Hours	Theory + Practical	10 Marks
8	Conditional loop & Case statement	02 Hours	Theory + Practical	10 Marks
9	Functions & Arrays	02 Hours	Theory	10 Marks
10	Redirection	01 Hours	Theory + Practical	10 Marks
11	Purchase and Reports in Front Accounting	02 Hours	Theory + Practical	10 Marks
Total hours/Class		30 Hours	Total Credit Point /Marks	100 Marks

Fee Structure:

- This ad-on course is offered free of cost to all the students for their skill development. The college does not charge any fees, either for doing the course, practical, examination or certification.

Curriculum of Certificate Course in AI IN MARKETING

Curriculum of Certificate Course in

AI IN MARKETING

Overview

AI in Marketing explores the growing role of artificial intelligence (AI) in transforming marketing strategies and practices. It covers how AI technologies, such as machine learning, natural language processing, and data analytics, are used to enhance customer targeting, personalize marketing campaigns, and optimize business performance. This course delves into practical applications of AI, including predictive analytics, chatbots, recommendation engines, and marketing automation. It also addresses ethical considerations, data privacy issues, and the future potential of AI in the marketing industry.

By completing this course, students will gain the knowledge and skills to leverage AI technologies effectively in marketing, creating more efficient, targeted, and personalized marketing campaigns that drive business growth.

Course Code : CC/VAC/AIM

Courses Duration : 56 Hours

Eligibility for Admission

- Candidates who are studying MBA/BBA courses in the college.

Duration:

- 56 Hours with Theory Only

Structure of Syllabus AI IN MARKETING

S. No.	Paper Topics	Duration	Remarks	Credit	Point/Marks
1	Understanding the basics of AI in Marketing (Continued), Introduction to AI Algorithms, Designs of AI, Transition process and AI matrix.	04Hours	Theory		08 Marks
2	Customer value and Role of AI in Value Delivery Process, Transforming Marketing Strategy using AI (Continued).	04 Hours	Theory		08 Marks
3	Using AI for STP, Application of AI in Marketing Mix, Marketing Information Systems and its Components.	04 Hours	Theory		05 Marks
4	What is Marketing Research (Continued), Individual Dynamics and its influence on Consumer Behaviour, Consumer Buying Decision Process, Understanding Customer Journey (Continued).	04 Hours	Theory		08 Marks
5	Customer Experience: Meaning & Characteristics, Personalization: Going Beyond Segmentation, Avatar marketing.	04 Hours	Theory		06 Marks
6	Standardization, Personalization & Relationalization of Brands using AI, Understanding Networks and Brand Network Effect, Understanding the Use of AI for Addressing Competition, AI and Brand Equity, AI and New Brand Realities	04 Hours	Theory		07 Marks
7	AI for Value Creation and Product Development, Personalization and hyper-personalization Using AI.	04 Hours	Theory		07 Marks
8	Implementation of AI by Product Managers, AI in Service, Pricing Strategies Using AI.	04 Hours	Theory		07 Marks
9	Role of AI in Advertising	04 Hours	Theory		07 Marks
10	AI in Sales promotion and Direct Marketing, AI in PR and Publicity and Social Media Marketing	04 Hours	Theory		07 Marks
11	AI and Marketing Channel Management, Omni-channel Marketing and Retailing, Changing face	04 Hours	Theory		05 Marks
12	Navigating Ethical Challenges in AI (Continued), AI and Sustainability	04 Hours	Theory		05 Marks
13	Case Study	04 Hours	Theory		10 Marks

14	Presentation	04 Hours	Theory	10 Marks
	Total hours/Class	56 Hours	Total Credit Point /Marks	100

Fee Structure:

- This ad-on course is offered free of cost to all the students for their skill development. The college does not charge any fees, either for doing the course, practical, examination or certification.

Designed & Developed By:

The course is designed by Mr. Anil kumar (Assistant Professor) approved by HOD and Board of Study (BOS) of Catalyst College, Patna.

Course Co-ordinator

- Mr. Nitish Kumar Rohatgi, Dept. of Management, Catalyst College, Patna

Curriculum of Certificate Course in (Financial Market & their components)

Curriculum of Certificate Course in Financial Market & their components

Overviews:

The objective of studying financial markets and their components is to understand how these markets facilitate the flow of capital, enable investment, and support economic growth by providing opportunities for businesses, governments, and individuals to raise and allocate funds efficiently. Financial markets are crucial for promoting transparency, liquidity, and price discovery, and they play a central role in determining the cost of capital, fostering economic stability, and enabling risk management.

Here's a breakdown of the following key objectives of studying financial markets and their components:

1. To comprehend how financial markets facilitate the efficient allocation of resources by enabling the transfer of funds between savers and borrowers.
2. To explore how financial markets aid in capital formation, which is essential for business expansion, technological innovation, and infrastructure development.
3. To study how financial markets contribute to price discovery — the process by which the price of an asset is determined based on supply and demand dynamics.
4. To understand how financial markets provide liquidity, allowing assets to be bought or sold quickly without significantly affecting their price.
5. To identify and understand the different components of financial markets, such as money markets, capital markets, foreign exchange (Forex) markets, and derivatives markets, and their specific roles.
6. To study the core functions of financial markets, including:
 - Raising Capital (via equity or debt instruments)
 - Facilitating Trading (through secondary markets for securities)
 - Enabling Risk Sharing and Hedging
 - Providing Information and Transparency
7. To learn about various financial instruments traded in financial markets, such as stocks, bonds, mutual funds, derivatives, options, and futures.
8. To analyze the roles of various participants in financial markets, such as individual investors, institutional investors, brokers, market makers

Course Code : CC/VAC/FMIS

Courses Duration : 40 Hours/Classes

Eligibility for Admission

- Candidates who are studying BBA, B.COM(P), MBA course in the college.

Duration

- 40 Hours/Class with theory & practical

Structure of Syllabus Income tax and its compliance

S. No.	Paper Topics	Duration	Remarks	Credit Point/Marks
1	Understanding the Role of Financial Markets in the Economy	03 Hours	Theory	10 Marks
2	Learning about Capital Formation and Investment	05 Hours	Theory	15 Marks
3	Exploring Market Efficiency and Price Discovery	06 Hours	Theory	10 Marks
4	Facilitating Liquidity and Risk Management	03 Hours	Theory	10 Marks
5	Understanding the Components of Financial Markets	04 Hours	Theory	10 Marks
6	Exploring the Functions of Financial Markets	04 Hours	Theory	10 Marks
7	Examining the Different Types of Financial Instruments	04 Hours	Theory	10 Marks
8	Studying Financial Market Participants	06 Hours	Theory	15 Marks
9	Understanding Market Regulation and Oversight	04 Hours	Theory	10 Marks

Curriculum of Certificate Course in (Big Data)

Curriculum of Certificate Course in Big Data

Overviews:

Big data refers to extremely large and diverse collections of structured, unstructured, and semi-structured data that continues to grow exponentially over time. These datasets are so huge and complex in volume, velocity, and variety, that traditional data management systems cannot store, process, and analyze them. These skills can be used in a variety of industries and job roles, including Problem handling, Server management, Database management, Data warehousing, Data Mining.

Course Code: **CC/VAC/BigData**

Courses Duration: **52 Hours/Classes**

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 52 Hours/Class with theory & practical

Structure of Syllabus Big Data

S. No.	Paper Topics	Duration	Remarks	Credit Point/Marks
1	Introduction Data Evolution Of Data, What is Big Data ? Types of Big Data	02 Hours	Theory	06 Marks
2	Download Oracle Virtual Box & Cloudera Quickstart VM, Configure and Install DFS, What is Hadoop? HDFS	07 Hours	Theory + Practical	15 Marks
3	Meta Data, Data, NSI/EL, Hadoop 1.0, Hadoop 1.6, Hadoop 2.0 High Availability, Major Version of Hadoop, Fencing and Failover, Federation, UNIX Commands	04 Hours	Theory+ Practical	05 Marks
4	HDFS Commands, RAC Awareness, Hadoop 1.X, Job Tracker, Task Tracker, 2.X YARN/MR2, Scheduling, FAIR Scheduling MapReduce, MapReduce Process, Mapper/Reducer, MapReduce	08 Hours	Theory + Practical	08 Marks
5	Datatypes, MapReduce Programs Lab Schedule in MapReduce, Run MapReduce Program, Combiner, Partitioner	07 Hours	Theory + Practical	10 Marks
6	SQOOP (Import/Export), Hadoop Environment (Run Code)	07 Hours	Theory + Practical	10 Marks
7	PIG (Transformation), ELT/ETL, PIG Mode, Lazy Execution, DFL Lab Schedule in PIG, Joins, CDC	08 Hours	Theory + Practical	15 Marks

Artificial Intelligence

Overviews:

This course provides an in-depth introduction to Artificial Intelligence (AI) concepts, techniques, and applications. It covers the fundamentals of AI, including problem-solving and search strategies, knowledge representation, and the design of intelligent agents. Students will explore various AI paradigms, such as natural language processing (NLP), fuzzy logic, and neural networks, and will apply this knowledge to practical problem-solving scenarios. This course is ideal for beginners in AI who want to gain a foundational understanding of the principles, algorithms, and applications in the field.

Course Code : CC/VAC/AI

Courses Duration : 40 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Curriculum of Certificate Course in (Advanced Computer Architecture)

Curriculum of Certificate Course in Advanced Computer Architecture

Overviews:

ABOUT THE COURSE:

This course is on Advanced Computer Architecture. It will introduce students to advanced aspects of processor design and will specifically focus on out-of-order pipelines, GPUs, and compiler techniques for enhancing ILP. The course will subsequently move on to cache design and main memory technologies such as DDR-4. A substantial portion of the course will be devoted to the theory of on-chip networks and memory models. The last part of the course will cover aspects of low-power design, hardware security, and reliability.

Course Code : CC/VAC/ACA

Courses Duration : 32 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 32 Hours/Class with Theory & Practical

Structure of Advanced Computer Architecture

S. No.	Paper Topics	Duration	Remarks	Credit

Curriculum of Certificate Course in (Advanced Computer Networks)

Curriculum of Certificate Course in Advanced Computer Networks

Overviews:

This is an advanced course on Computer Networks covering four main contemporary topics namely how high performance networks are designed covering algorithms and implementations, data center networking, information centric networking and network softwarization: software defined networking, network virtualization and programmable networks. This course assumes a basic knowledge of computer networks and working proficiency with Unix/Linux Operating Systems. It has practical component with programming assignments giving hands on to the students.

Course Code : CC/VAC/ACN

Courses Duration : 32 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 32 Hours/Class with Theory & Practical

Structure of Advanced Computer Networks

S. No.	Paper Topics	Duration	Remarks	Credit
1	High Performance Switching and Routing: Introduction, performance considerations, IP address lookup	02 Hours	Theory	08 Marks
2	Algorithms for IP address lookup and optimization, hardware implementation of address lookup	03 Hours	Theory + Practical	10 Marks
3	Packet Classification: Need for packet classification and methods for packet classification.	02 Hours	Theory + Practical	05 Marks
4	Differentiated Service, Quality of Service, Traffic Polishing, Traffic Shaping	02 Hours	Theory + Practical	05 Marks
5	Network Softwarization - Introduction	02 Hours	Theory + Practical	06 Marks
6	Software Defined Networking (SDN) - Deep Dive (Northbound and Southbound interface) , Working with Mininet + Lab Exercise with Mininet	03 Hours	Theory + Practical	10 Marks
7	Network Function Virtualization (NFV) - Architecture and Concepts	04 Hours	Theory + Practical	15 Marks
8	Programmable Networks - Introduction to P4, SmartNICS and P4 switches. + Lab Exercise with Mininet and BMV2 switches.	02 Hours	Theory + Practical	08 Marks
9	Data Center Networking (DCN) - Introduction	02 Hours	Theory + Practical	08 Marks
10	DCN - Deep Dive (Network topologies, Container Network Interfaces)	04 Hours	Theory + Practical	10 Marks
11	Content Distribution on the Internet, Architectures for Information Centric networking	02 Hours	Theory + Practical	05 Marks

Curriculum of Certificate Course in (Developmental Analysis)

Curriculum of Certificate Course in Developmental Analysis

Overviews:

The objective of developmental analysis is to assess and understand the progress, challenges, and impact of development activities within a specific area, region, or sector. Developmental analysis is typically focused on evaluating how effectively policies, programs, and initiatives contribute to the social, economic, and environmental development of a country, region, or community. It involves assessing both the inputs (resources, policies, and interventions) and the outputs (outcomes and impacts) of development efforts to identify areas for improvement, challenges, and opportunities for sustainable development.

Following Key Objectives of Developmental Analysis

1. To evaluate the effectiveness of development policies, programs, and projects in achieving their intended goals, such as poverty reduction, economic growth, health improvements, and education.
2. To examine the economic performance of a country or region by analyzing key indicators such as GDP growth, income distribution, employment rates, and industrial development.
3. To analyze progress in improving social indicators such as healthcare access, education, housing, sanitation, gender equality, and human rights.
4. To identify disparities in wealth, income, and access to resources across different groups (e.g., rural vs. urban, gender, ethnic groups, etc.).
5. To ensure that development benefits all members of society, particularly marginalized or vulnerable groups, including women, children, people with disabilities, and indigenous communities.
6. To assess human development through indices such as the Human Development Index (HDI), which combines measures of life expectancy, education, and income.
7. To evaluate the success of poverty alleviation strategies, programs, and initiatives, particularly in terms of improving income levels, access to basic services, and social mobility.

8. To align developmental analysis with global frameworks such as the United Nations Sustainable Development Goals (SDGs), which focus on key areas like poverty, hunger, health, education, climate action, and gender equality.
9. To track long-term trends in development, such as changes in employment, income levels, infrastructure development, or social mobility, and analyze factors driving those trends.

Curriculum of Certificate Course in Immersive Technologies

Overviews:

In terms of knowledge, the students will understand immersive technology fundamentals: Definitions, types (VR, AR, MR), and history. They will become familiar with devices (HMDs, controllers, sensors) in addition to gaining knowledge of Unity, Unreal Engine, or other immersive technology platforms. The students will also be able to understand user experience, interface design, and interaction principles, which will help them in designing immersive storytelling, which includes principles of narrative design, storytelling, and emotional engagement.

After gaining the concept about the above mentioned topics, students would like to apply this knowledge for design, development, and demonstration of immersive technology projects or work with artists, designers, writers, and programmers on immersive projects.

They can even explore applications in education, healthcare, entertainment, and other fields and design immersive experiences for diverse audiences. Last but not the least, it will be a huge help in communicating project ideas and goals.

Course Code : CC/VAC/IT

Courses Duration : 40 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 40 Hours/Class with theory & Practical

Structure of Syllabus Financial Accounting Concepts with Tally ERP

S. No.	Paper Topics	Duration	Remarks	Credit
				Point/Marks
1	Introduction to Augmented reality and its types	06 Hours	Theory	7 Marks
2	Tools and technologies used in designing an AR project	04 Hours	Theory + Practical	12 Marks
3	Introduction to Virtual reality	02 Hours	Theory	10 Marks
4	Understanding the concept of virtual reality and its hardware requirements	04 Hours	Theory	10 Marks
5	Designing principle for VR	02 Hours	Theory + Practical	10 Marks
6	2D game development using the concept of AR/VR	04 Hours	Theory + Practical	12 Marks
7	Introduction to Mixed reality	04 Hours	Theory	10 Marks
8	Industrial use of AR, VR, and MR	04 Hours	Theory	12 Marks
9	Understanding the concept of exclusive technologies	06 Hours	Theory	8 Marks
10	Case study	04 Hours	Theory + Practical	9 Marks
Total hours/Class		40 Hours	Total Credit Point /Marks	100 Marks

Fee Structure:

- This ad-on course is offered free of cost to all the students for their skill development. The college does not charge any fees, either for doing the course, practical, examination or certification.

Deigned & Developed By:

The course is designed by Akanksha, approved by HoD and Board of Study (BOS) of Catalyst College, Patna.

Course Co-ordinator

- Mr. Amit Shukla, Dept. of IT, Catalyst College, Patna.

Curriculum of Certificate Course in Embedded system in C

Overviews:

In terms of knowledge, the students will understand embedded system fundamentals like architecture, hardware components, and software development. They will become familiar with C programming concepts, data types, operators, control structures, functions, and pointers and use this in embedded system programming concepts. They will gain the knowledge about interrupts, timers, and input/output operations.

The students will also be able to familiarize with microcontroller architecture, including memory organization, registers, and instruction sets. They will also know about the design process for embedded systems, including requirements analysis, hardware and software design

After gaining the concept about the above mentioned topics, students would be able to develop C programs for embedded systems, including coding, debugging, and testing. They will be able to design, develop, and test embedded systems using microcontrollers and development boards, including using program interfaces, GPIO, UART, SPI, I2C, and ADC. They would be able to implement interrupt handling mechanisms in C and they could use debugging tools and techniques to identify and resolve issues.

Curriculum of Certificate Course in (Cyber Security)

Curriculum of Certificate Course in Cyber Security

Overviews:

This course introduces to management students the concepts, technologies, practices and challenges associated with cybersecurity as applied in organizations. Protection as well as disclosure of information pose unique challenges and also allude to economic and technological implications. Breach of information privacy has been reported as having serious consequences to all the stakeholders involved from the origin to end use of data. Furthermore, cyber security has often been analyzed independent of information privacy, which thus lacks a wholesome picture of investments, benefits and stakeholder concerns. The course takes a broad view of cyber security along with information privacy by analyzing relevant organizational, human, legal and policy issues.

Through this course, students will explore cyber security along with information privacy with a managerial focus. Students are expected to develop a wholesome understanding about cyber security and privacy risks to businesses covering governance, compliance and risk mitigation and closely study certain business domains.

COURSE LEARNING OBJECTIVES

- To recognize cyber security from technological and administrative perspectives
- To articulate cyber security governance, risks and compliance in the current business environment
- To apply cybersecurity and information privacy in organizational context for risk assessment
- To develop cyber security and information privacy policy in selected business domains

Course Code : CC/VAC/CSEC

Curriculum of Certificate Course in BUSINESS FUNDAMENTALS

Curriculum of Certificate Course in BUSINESS FUNDAMENTALS

Overview of

Business fundamentals provide a foundational understanding of how businesses operate and the key principles that govern business activities. This subject covers the essential concepts of management, marketing, finance, economics, and organizational behavior, offering a broad understanding of how various functions within a company work together to achieve success.

The course covers ALL aspects of a company (e.g. company structure, vision, mission, strategy, manufacturing, finance, leadership & people management, marketing, sales, customer service, supply chain, retail & distribution, ESG) tending of how various functions within a company work together to achieve success.

Course Code : CC/VAC/BF

Courses Duration : 40 Hours

Eligibility for Admission

- Candidates who are studying MBA/BBA courses in the college.

Duration:

- 40 Hours with Theory Only

Structure of Syllabus BUSINESS FUNDAMENTALS

S. No.	Paper Topics	Duration	Remarks	Credit	Point/Marks
1	Business History, Environment & Trends, What is a Company? Types of Companies	04 Hours	Theory		08 Marks
2	Understanding the Purpose of a Company	03 Hours	Theory		06 Marks
3	Producing High-Quality Products	04 Hours	Theory		08 Marks
4	Sustaining a great business	03 Hours	Theory		06 Marks
5	Studying Markets, Competitors & Customers	03 Hours	Theory		06 Marks
6	Winning in the Market Place	04 Hours	Theory		06 Marks
7	Building Customer Loyalty	04 Hours	Theory		06 Marks
8	Reaching your customers	03 Hours	Theory		06 Marks
9	Defining your Business Model	04 Hours	Theory		08 Marks
10	Social Entrepreneurship	04 Hours	Theory		06 Marks
11	Environment, Social & Governance (ESG) Investing	04 Hours	Theory		08 Marks
12	Communication & Conclusion	04 Hours	Theory		06 Marks
13	Case study	04 Hours	Theory		10 Marks
14	Presentation	04 Hours	Theory		10 Marks
Total hours/Class		52 Hours	Total Credit Point /Marks		100

THE POWER OF HABIT

Why we do what we
do and how to *change*

**Curriculum of Certificate Course in
(Power of Habits)**

Curriculum of Certificate Course in Power of Habits

Overview:

The Power Of Habit helps you understand why habits are at the core of everything you do, how you can change them, and what impact that will have on your life, your business and society.

Why Knowledge of Habits is important for students: Any behavior or action you engage in regularly counts as a habit — from having coffee as soon as you get to the office to brushing your teeth just before going to bed.

Some habits can promote physical and mental wellness, while others might have more of an unwanted impact on your everyday life. With a little effort, though, it's possible to change habits that no longer serve you and create new ones that do.

We've partnered with to learn how habits can benefit you, plus get tips on breaking unhelpful habits and replacing them with ones that better support your well-being.

Course Code: CC/VAC/POH

Curriculum of Certificate Course in Payroll Management

Overviews:

Payroll management is a critical function within organizations, encompassing the process of administering employee compensation, including wages, bonuses, deductions, and taxes. Effective payroll management ensures that employees are paid accurately and on time, while also meeting compliance requirements with governmental regulations.

Payroll management involves several key components. First is payroll calculation, which requires accuracy in processing wages, overtime, and other compensatory elements according to company policy and labor laws. Then, compliance with regulations is crucial, Payroll managers often work closely with HR to ensure all processes comply with employment laws, including minimum wage, overtime pay, and tax obligations.

Effective payroll systems and knowledgeable professionals can ensure that this complex process is managed smoothly, contributing to organizational stability and trust among employees.

Why knowledge of Payroll Management is Important for HR Students:

Knowledge of payroll management is essential for HR students for several reasons, as it forms an integral part of human resource management and directly impacts employee relations, legal compliance, and organizational efficiency.

- 1. Understanding Employee Compensation:** HR students need to understand how payroll systems calculate gross and net pay, including deductions for taxes, retirement contributions, and other benefits.
- 2. Legal and Regulatory Compliance:** HR students must be knowledgeable about these laws to ensure organizations adhere to minimum wage standards, overtime laws, and tax compliance.
- 3. Cross-Functional Collaboration:** HR students with knowledge of payroll can work more effectively with finance teams, as they'll understand the impact of payroll on budgeting and financial planning.

4. **Technology and Data Management Skills:** Knowledge of payroll management introduces HR students to data management, software usage, and data security best practices, preparing them for technology-driven roles in HR.
5. **Financial Acumen:** For HR students, understanding payroll management fosters financial acumen, helping them comprehend the financial impact of HR decisions, such as hiring, salary increments, and benefits planning to make an informed decision that align with the company's financial objectives.
6. **Employee Relations and Trust:** Knowledge in payroll management equips HR students to handle payroll issues promptly and effectively, maintaining transparency and trust with employees.
7. **Strategic HR Role:** In many organizations, HR is becoming more strategic, focusing on employee engagement, retention, and talent management.
8. **Global Payroll Management:** HR students with a global payroll perspective will be more prepared to support international teams and ensure compliance across various jurisdictions.

In conclusion, payroll management knowledge prepares HR students to handle one of HR's most sensitive and essential responsibilities. This skill set is invaluable for any HR professional aiming to create a positive workplace and support organizational growth.

Curriculum of Certificate Course in (Ethical Hacking)

Curriculum of Certificate Course in Ethical Hacking

Overviews:

Ethical hacking is a technology career with specific skills, and cybersecurity certifications help people break into the field. Many ethical hacking jobs still require a bachelor's degree in information technology, or another technology or cybersecurity related degree. However more employers are considering candidates without degrees in favor of experience and certifications. The most proficient ethical hackers have a combination of a degree, experience and certifications.

Ethical hackers should also have a working knowledge of infrastructure technology including Linux servers, Cisco network controls, virtualization, Citrix and Microsoft Exchange. Computer programming experience and understanding of various programming languages is required for advanced positions.

Course Code : CC/VAC/EH

Courses Duration : 50 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 50 Hours/Class with Theory & Practical

Curriculum of Certificate Course in (Blockchain)

Curriculum of Certificate Course in Blockchain

Overviews:

Blockchain technology has generated massive interest among governments, enterprises, and academics, because of its capability of providing a transparent, secured, tamper-proof solution for interconnecting different stakeholders in a trustless setup. In January 2021, the Ministry of Electronics and Information Technology (MeiTY), Government of India, published the first draft of the "National Strategy on Blockchain" that highlights 17 potential applications that are of national interest. Against this backdrop, this subject will cover the basic design principles of Blockchain technology and its applications over different sectors. Additionally, the course also provides tutorials on setting up blockchain applications using one of the well-adopted permissionless blockchain platforms - Ethereum, and one permissioned blockchain platform - Hyperledger.

Course Code: CC/VAC/BL

Courses Duration: 32 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA/BScIT course in the college.

Duration

- 32 Hours/Class with theory & practical

Structure of Syllabus Blockchain

S. No.	Paper Topics	Duration	Remarks	Credit Point/Marks
1	Introduction to Blockchain Technology and its Importance	02 Hours	Theory	06 Marks
2	Basic Crypto Primitives I – Cryptographic Hash	02 Hours	Theory + Practical	15 Marks
3	Basic Crypto Primitives II – Digital Signature	04 Hours	Theory	05 Marks
4	Evolution of the Blockchain Technology	04 Hours	Theory + Practical	08 Marks
5	Elements of a Blockchain	03 Hours	Theory + Practical	10 Marks
6	Blockchain Consensus I – Permissionless Models	02 Hours	Theory + Practical	10 Marks
7	Blockchain Consensus II – Permissioned Models	04 Hours	Theory + Practical	10 Marks
8	Smart Contract Hands On I – Ethereum Smart Contracts (Permissionless Model)	03 Hours	Theory + Practical	08 Marks
9	Smart Contract Hand On II – Hyperledger Fabric (Permissioned Model)	02 Hours	Theory	08 Marks

Curriculum of Certificate Course in Artificial Intelligence & Machine Learning

Overviews:

With the increased availability of data from varied sources there has been increasing attention paid to the various data driven disciplines such as analytics and machine learning. In this course we intend to introduce some of the basic concepts of machine learning from a mathematically well motivated perspective. We will cover the different learning paradigms and some of the more popular algorithms and architectures used in each of these paradigms.

pythonTM
programming

Curriculum of Certificate Course in (Python Programming)

Curriculum of Certificate Course in Python Programming

Overview of Python

Python is a high-level, interpreted programming language known for its simplicity, readability, and versatility. It was created by Guido van Rossum and first released in 1991. Python emphasizes code readability and allows developers to express concepts in fewer lines of code compared to languages like C or Java.

Course Code: CC/VAC/Python

Courses Duration: 60 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 60 Hours/Class with theory & practical

Structure of Syllabus Python Programming

S. No.	Paper Topics	Duration	Remarks	Credit Point/Marks
1	Python programming – overview Python programming – environment setup	02 Hours	Theory + Practical	07 Marks
2	Python programming – Program Structure Python programming – Basic syntax Python programming – data types Go programming – variables	07 Hours	Theory + Practical	8 Marks
3	Python programming – constant Python programming – operators Python programming – decision making Python programming – loops Python programming – functions	04 Hours	Theory + Practical	05 Marks
4	Python programming – List Python programming – Tuples Python programming – Sets Python programming – Dictionary	05 Hours	Theory + Practical	08 Marks
5	Python programming – String Python programming – slicing	05 Hours	Theory + Practical	7 Marks
6	Python programming – Function and its arguments Python programming – Default Argument, Keyword Argument, Arbitrary Arguments List	07 Hours	Theory + Practical	7 Marks
7	Python programming – Intro to File System, Writing data to file, Reading data from file. Python programming – Methods of file objects	06 Hours	Theory + Practical	8 Marks
8	Python programming – Exception handling, Syntax Errors, Exceptions, try, except, finally	04 Hours	Theory + Practical	08 Marks
9	Python programming – Module, Creating Modules, Import a module, import the names, executing modules as scripts	04 Hours	Theory+ Practical	08 Marks
10	Python programming – Class and Objects, instance objects, method objects, constructor, destructor, overloading, overriding	05 Hours	Theory + Practical	12 Marks
11	Python programming – Regular Expression, date and time libraries, dealing with Excel, GUI, Web Scrapping	05 Hours	Theory + Practical	10 Marks

12	Python programming – Python Analytic, Numpy, Scipy, Pandas, Matplotlib, Scikitlearn, Statsmodels, Seaborn, Urllib2	06 Hours	Theory + Practical	12 Marks

Curriculum of Certificate Course in Cloud Computing

Curriculum of Certificate Course in Cloud Computing

Overviews:

Cloud computing is a scalable services consumption and delivery platform that provides on-demand computing service for shared pool of resources, namely servers, storage, networking, software, database, applications etc., over the Internet. It is a model for enabling ubiquitous, on-demand access to a shared pool of configurable computing resources, which can be rapidly provisioned and released with minimal management effort. This course will introduce various aspects of cloud computing, including fundamentals, management issues, security challenges and future research trends. This will help students (both UG and PG levels) and researchers to use and explore the cloud computing platforms.

Course Code : CC/VAC/CC Courses Duration : 30 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA course in the college.

Duration

- 30 hours class with theory and practical.

Structure of Syllabus Cloud Computing

Drupal™

**Curriculum of Certificate Course
in
(DRUPAL)**

Curriculum of Certificate Course in DRUPAL

Overviews: Drupal is a free, open-source Content Management System (CMS) written in PHP. It's a robust, scalable, and flexible platform for building various types of websites, applications, and digital experiences.

Key Features:

1. Modular architecture
2. Extensive community-driven ecosystem (70,000+ modules)
3. Highly customizable and configurable
4. Strong security features
5. Scalability and performance optimization
6. Multi-language support
7. Responsive design
8. Integration with third-party services (APIs)

Objectives:

1. Understand Drupal basics (nodes, entities, fields)
2. Learn Drupal terminology (modules, themes, distributions)
3. Install and configure Drupal
4. Create content types and fields
5. Manage users and roles

Project-Based Learning

1. Build a simple blog using Drupal
2. Create a custom Drupal theme
3. Implement Drupal commerce for e-commerce

Course Code: CC/VAC/Drupal

Courses Duration: 35 Hours/Classes

Eligibility for Admission

- Candidates who are studying BCA/BScIT/BBM course in the college.

Curriculum of Certificate Course in (Banking System In India)

Curriculum of Certificate Course in Banking System In India

Overviews:

The banking system in India is a well-structured and regulated framework that plays a pivotal role in the country's economic development. It facilitates the flow of capital and credit in the economy, supports industrial growth, provides financial inclusion, and contributes to the overall financial stability of the nation.

The banking system in India operates under the regulatory framework established by the Reserve Bank of India (RBI), which is the central bank of the country. The system comprises multiple layers of institutions, ranging from central banks to commercial banks and cooperative banks.

LibreOffice

Curriculum of Certificate Course in (LibreOffice Suite Writer)

Curriculum of Certificate Course in LibreOffice Suite Writer

Overviews:

LibreOffice Writer is a word processor and publishing tool similar to Microsoft Office Word and Corel WordPerfect. Writer easily reads Microsoft Word documents (.docx, .doc), and you can also save your work in Microsoft Word format.

Text frames and linking give you the power to tackle desktop publishing tasks for newsletters, flyers and much more, with layouts just like you want them to be. Writing documents online is easy now. LibreOffice Writer can display multiple pages while you are editing - ideal for complex documents. Perfect editor that requires no download!

Key features:

- Templates and styles
- A spelling and grammar checker
- Word and character count
- Page-layout methods, including frames, columns, and tables
- Embedding or linking of graphics, spreadsheets, and other objects
- Built-in drawing tools
- Master documents — to group a collection of documents into a single document
- Change tracking during revisions
- The ability to import and edit PDF files.
- Database integration, including a bibliography database
- Indexing
- AutoCorrect and AutoComplete
- Saving files to the cloud

Course Code : CC/VAC/LO

Curriculum of Certificate Course in (Retail Management)

Curriculum of Certificate Course in RETAIL MANAGEMENT

Overviews:

Retail Management as a subject provides students with an understanding of the processes and strategies involved in managing retail businesses. It covers a wide range of topics, including store operations, merchandising, customer relationship management, supply chain management, and the use of technology in retailing.

Why is Retail Management so important?

Retail management is essential for driving business growth, ensuring operational efficiency, meeting customer expectations, and sustaining long-term profitability in the fast-paced and ever-evolving retail industry.

Retail Management is crucial for several reasons, as it plays a pivotal role in ensuring the success and sustainability of retail businesses.

In a highly competitive retail environment, efficient management practices allow businesses to differentiate themselves through superior customer service, innovative products, and operational excellence, gaining an edge over competitors.

The **objective of retail management** is to ensure that a retail business operates efficiently and effectively, meeting customer needs while achieving financial and operational goals. It involves overseeing various aspects of the retail operation, from inventory management and customer service to pricing and marketing strategies.

Curriculum of Certificate Course in (Internet of Things)

Curriculum of Certificate Course in Internet of Things (IOT)

Overviews: The Internet of Things (IoT) describes the network of physical objects— “things”—that are embedded with sensors, software, and other technologies for the purpose of connecting and exchanging data with other devices and systems over the internet.

Why is Internet of Things (IoT) so important?

Over the past few years, IoT has become one of the most important technologies of the 21st century. Now that we can connect everyday objects—kitchen appliances, cars, thermostats, baby monitors—to the internet via embedded devices, seamless communication is possible between people, processes, and things.

By means of low-cost computing, the cloud, big data, analytics, and mobile technologies, physical things can share and collect data with minimal human intervention. In this hyperconnected world, digital systems can record, monitor, and adjust each interaction between connected things. The physical world meets the digital world—and they cooperate.

What technologies have made IoT possible?

While the idea of IoT has been in existence for a long time, a collection of recent advances in a number of different technologies has made it practical.

- **Access to low-cost, low-power sensor technology**
Affordable and reliable sensors are making IoT technology possible for more manufacturers.
- **Connectivity**
A host of network protocols for the internet has made it easy to connect sensors to the cloud and to other “things” for efficient data transfer.
- **Cloud computing platforms**
The increase in the availability of cloud platforms enables both businesses and consumers to access the infrastructure they need to scale up without actually having to manage it all.
- **Machine learning and analytics**
With advances in machine learning and analytics, along with access to varied and vast amounts of data stored in the cloud, businesses can gather insights faster and more easily. The emergence of these allied technologies continues to push the boundaries of IoT and the data produced by IoT also feeds these technologies.

- **Artificial intelligence (AI)**

AI is driving an increase in demand for cloud computing services and data centers, as large amounts of data are required in AI model training to detect patterns or predict numbers.

Curriculum of Certificate Course in Time Management

Overview of Time Management

Time management refers to the process of planning and exercising conscious control over the amount of time spent on specific activities. It aims to improve productivity, efficiency, and work-life balance. Effective time management helps individuals prioritize tasks, avoid procrastination, and reduce stress by ensuring deadlines are met and goals are achieved.

Objectives of Time Management

1. **Enhance Productivity:** Maximize the output by organizing and prioritizing tasks.
2. **Achieve Goals:** Break down long-term goals into manageable tasks and complete them systematically.
3. **Reduce Stress:** Minimize the anxiety caused by tight schedules or unorganized workflows.
4. **Improve Decision-Making:** Allocate time for critical thinking and better judgment.
5. **Promote Work-Life Balance:** Ensure adequate time is allocated for personal and professional activities.
6. **Optimize Resource Use:** Utilize available resources effectively within a limited timeframe.
7. **Eliminate Procrastination:** Encourage focus and timely completion of tasks.

Time management is essential for achieving personal and professional success, fostering efficiency, and maintaining overall well-being.
